"ET" ELECTRIC TRAMS

ELECTRIC TRAMS
BT2-80
BT2-48

"ET" Trams are unique solutions for the safest and most economical ways to transport your customers or employees. Equipped with T9-41 or T9-42 passenger trailers, they can transport over 30 people in a single trip. Low step height, increased visibility, and all seats facing forward make E-Tram one solution for transporting personnel. The B-Tram is designed to carry passengers back-to-back when the side-seating configuration is preferred.

"TT" TOW TRACTORS

Taylor-Dunn tow tractors are engineered to provide reliable, safe, cost-effective, and maneuverable service in any towing application. The muscle of Taylor-Dunn's automotive drive train will allow its tractors to tow loads up to 30,000 pounds, in a mode that is emission free and quiet. With the inherent cost benefits of utilizing electric vehicles, Taylor-Dunn tow tractors are the best way to get about your business.

"SC" STOCKCHASERS

Stockchasers are a cost-effective solution to improve efficiency in warehousing applications. These narrow aisle, highly maneuverable vehicles bring the operator closer to the material that needs to be picked. Equipped with stepladders, they allow operators to pick materials from higher stock locations. Several options are available that provide maximum functionality for your operation.

The best way to go about your business

TAYLOR-DUNN MANUFACTURING

Since 1949, Taylor-Dunn Manufacturing has produced electric vehicles in Anaheim, California. T-D vehicles provide tough, dependable, and reliable solutions to your material and personnel handling business needs. With a complete line of electric powered burden carriers, personnel carriers and tow tractors, the Taylor-Dunn name is synonymous with the quality our customers have come to expect for over fifty years.

UNITED TRACTOR

United Tractor has been a leading manufacturer of internal combustion, high capacity push back and tow tractors for industrial and ground support applications. Tractor capacities range from 3,000 to 48,000 lbs. drawbar pull, and are available in standard and custom configuration to meet all your handling needs. Quality, service, support and reliability are built into all of our products to provide years of customer satisfaction.

TIGER MANUFACTURING

Tiger manufacturing has become a leading manufacturer of internal combustion industrial tractors and ground support equipment. With tractor capacities ranging from 3,000 to 6,000 lbs. they are ideal for industrial applications as well as aircraft ground support. Our product line includes tow tractors, belt loaders and chaises. As with all Taylor-Dunn vehicles; quality, service, support and reliability are built into all of our products.

METRO CROWN INTERNATIONAL

Metro Crown International, located in Kansas City, MO. is one of the world's leading suppliers of replacement parts for industrial applications and the airline ground support industry. We are the factory authorized OEM distributor for parts for Tiger, United Tractor, Kalamazoo and FMC challenger belt loader brands, as well as, the North American distributor for Sevcon controllers. Both domestic and international customers have come to depend upon MCI to provide quality, personalized service and to count on them for accurate, reliable answers.

KALAMAZOO

Kalamazoo produces a full line of internal combustion Industrial burden carriers. With payload capacities that range from 2,000 to 6,000 lbs. they are available in both standard and custom configurations to meet you material handling needs. As with all Taylor-Dunn vehicles; quality, service, support and reliability are built into all of our products.
